

Economics

Our economics tutors may require you to take one or more of the core papers when they feel it would be essential to ensure that you would fully benefit from the teaching of your choices of options. They may also require you to take some mathematics and/or statistics classes. A good level of algebra and calculus is assumed in many of the lectures and tutorials, both for the core and option subjects. While every effort will be made to accommodate your choices, we might not be able to offer a particular course if oversubscribed.

Core Papers:

Quantitative Economics (Econometrics)

Macroeconomics

Microeconomics

Options:

Microeconomic Analysis

Money and Banking

Public Economics

Economics of Industry

Labour Economics and Inequality

International Economics

Economics of Developing Countries

Development of the World Economy since 1800
